

# SANDRA VILA

## SANDRA VILA DESIGN HOUSE

Enter the world of design guided by the visionary prowess of Sandra Vila, a distinguished Southern California-based designer renowned for her creation of modern classic environments that effortlessly withstand the test of time. Rooted in a multi-faceted background spanning design, marketing, luxury real estate and fashion,

Vila seamlessly integrates her love for travel, passion for the arts and respect for historical architecture to establish an enduring design philosophy to live beautifully.

Vila started her design career in San Francisco where she discovered a love for architecture, antiques and living beautifully.

Drawing from an eclectic mix of influences, Vila masterfully blends her comprehensive design knowledge with an instinctive sense of artistry. Her design ethos is based on the concept of less neutralization and more personalization. Rather than designing to please others or for resale, Vila hones in on her clients desires to create a space that truly encapsulates who they are and tells *their* story.

Having recently completed a Frank Lloyd Wright inspired estate, Vila's ability to transform milieus of any style of genre is her signature. Vila is currently working on architecturally unique water-oriented homes in

Laguna Beach, Corona Del Mar and La Jolla, each with a unique coastal contemporary aesthetic that emphasizes the California lifestyle. Also set to finish this year is her own home, a sanctuary influenced by her love for mid-century design and her Cuban heritage. From the structure and materials to the furnishings and lighting, the home will inspire and provide insight to the functionality of curated design.

Vila's journey into the design world is supported by a solid educational foundation including a Bachelors in Interior Design from the Interior Designers Institute and a Bachelors in Marketing from the University of Arizona, along with memberships in ICAA, ASID, and IIDA.

Beyond her professional endeavors, Vila embraces a life rich in experiences. From her time on construction sites to family moments, outdoor adventures, and world travel, she draws inspiration from the tapestry of life itself. ❶
